Plant Is Now Down to Regulation Work.

VISITORS HIGHLY PLEASED

GOODSELL PROPERTY OPENS FINE ORE BODIES.

With their rounds of the mining camps barely commenced Messrs, C. int W. Cheney and Louis' Hoover, the Sheibyville, Ind., operators who are largely interested in Utah and Wyoming mines, were suddenly called home.

May Day and Star Consolidated both continued active at about the same fig. Shelbyville, Ind., operators who are largely interested in Utah and Wyoming mines, were suddenly called home ming mines, were suddenly called home and left yesterday noon. Wednesday, in company with Manager H. S. Joseph of the Silver Shield and Leo Marix, they went out to Bingham and, guilded by Superintendent Mayberry, went all through the workings of the United States company's mines, Leaving camp late in the afternoon the entire party came down into the valley and visited the company's smelter, where they found everything moving like clockwork, and fully prepared to say that they had seen the finest plant of the kind they had ever heard of.

of.

It will not be out of place here to say that the United States smelter has now stepped out of its swaddling clothes and, with close to the maximum tonnage of ore going through its furnaces, a saving is being effected such as no other like plant in the world is exceeding. The "dust nuisance," over which so much talk has been indulged in, and which was caused by the various experiments with different characters of charges in the furnaces and various pressures from the air blasts, has been so completely mastered that at this time no more smoke and dust comes from the great stack than is to be naturally expected from work of that character. Of course, the management is not releasing accurate data on the point, but it comes from a most reliable quarter that, where the average value of the bullion made during the first few months was a little over 23c per pound, it is now cutting close to the 35c mark.

It takes time to make any sort of a new smelting and reduction plant do its work perfectly and it is safe to say that the United States company has taken the "kinks" out of its smelter as rapidly and as completely as has any ever placed in operation in this state.

WILL SINK TURRER WEYLS.

WILL SINK THREE WELLS.

Mt. Pleasant Company Closes Contract For the Work.

Mt. Pleasant, March 26.—An agreement was reached this morning between two local companies which practically insures the beginning of devices. two local companies which practically insures the beginning of development work on the oil lands lying north and west of this city within sixty days.

The land in question is owned by the Mt. Pleasant Oil & Gas company, and on the surface gives every indication of being very rich with oil. Three different experts have examined it closely and have presourced it the very best land in this vicinity, and said that they were as positive as men could be under the circumstances that a well there meant oil. With these assurances behind them the owners of the property have been endeavoring for some time to interest capital to invest there, but so far without success. Negotiations are still under way with several eastern firms.

By the agreement entered into this

By the agreement entered into this morning the sinking of two or three wells is certain. The company has decided to put these wells down itself and has contracted with a local well-boring company to do the work. This company has been recently formed and is composed of three strong men of this city, Brigham Lee, Hans P. Jacobsen and C. J. Rasmussen. They will have a well-boring butfit on the ground by May I, and during the summer will hore the three wells which the oil company wishes put down in order to ascerany wishes put down in order to asceris in the ground.

AT THE SCOTTISH CHIEF. Good Headway Being Made With Developments.

velopments.

Manager Will J. Lawrence and F. C. Dern, one of the directors in the company, returned Wednesday night from a three days' trip to the Scottish Chief, above Park City. They bring down a good report from the mine, where eleven men are steadily pushing development work. The shaft is now down 325 feet and on the 215-foot level the drift is out a distance of fifty-eight feet, with about forty feet further to go to tap the ore chute opened above.

No attempt is now being made to

opened above.

No attempt is now being made to take out ore, all efforts being with a purpose of tapping the ore at depth. The shaft is to be continued on down until the ore chute is intercepted, after which it will be opened up and got in readiness for stoping on the several different levels. The snow is very deep at the mine and the present torce will not be increased until it is possible to take in supplier.

W. F. SNYDER'S RETURN.

Declined to Say Anything About Bingham Directors' Meeting.

Willard F. Snyder, president and Wiliard F. Snyder. president and manager of the Western Exploration company, returned from his trip to Chicago, Boston and New York last Wednesday night. Questioned as to what had taken place at the Bingham Consolidated company's meeting in Boston, he declared that he was not at liberry if say. It was a directors' gathering and he was not a director of the company, so he did not feel that he had any right to speak of its business affairs.

fairs,
As for his own business matters, Mr.
Snyder said that several transactions,
were being rounded out, and later in
the season he expected to be able to release news that would be of interest to
the mining fraternity of the state. In
every city that he visited he found the
keenest kind of interest manifested in
Utah and western enterprises generally. Utah and western enterprises generally.

GOODSELL ORE BODIES.

American Fork Mine Has Opened

Nine Feet of Fine Shipping Rock. Nine Feet of Fine Shipping Rock.

Reports from the Goodsell Mining company's property in Americar Fork district are to the effect that during the winter a nine-foot body of the finest kind of shipping ore has been opened up. As soon as the roads are opened to teaming in the spring the marketing of ore, it is said, will begin and continue regularly.

The Goodsell company is one which

has been persistently opening up its property for the past two years and that it has finally converted its prospect into a mine will be good news to everybody. Last summer it was equipped with machinery and since that time rapid progress in carrying out the plan of campaign decided upon by President Goodsell during his visit here has been visorously executed. The the ore market in the near future.

UTAH'S TREASURES.

There are few states in the Union that afferd as good opportunities for good mining investments as Utah. We have gold and sliver, copper, lead and from and all in large quantities. Some of the mines have been shipping ore for a number of years, and some are new, but all afford splendid opportunities for making money. If you prefer a good interest to a chance, buy stocks in the older mines that pay regular dividends. If you want to take a chance for more put your money in the new mines that are close to dividends. I can tell you about a number if you will call or write.

TODAY AND TOMORROW

A PHENOMENAL SILK SALE!

2,500 Yards of 85c. \$1.00, \$1.25 a yard Silks at 55c

Such astonishing reductions cry loudly for an explanation. A leading New York importer was anxious to clean up a number of sample lines of novelty silks and 50 colors of fine taffeta silks, and was willing to let them go at an almost nominal price. We accepted his proposition. Now the silks are here ready for today and tomorrow's most notable silk sale.

Remember—The Auerbach silk counter is the place and, instead of your paying 85c, \$1.00 and \$1.25, you'll get 55C yd

First Spring Sale

Ladies' Percale Wrappers

TODAY AND TOMORROW, Red, Blue and Black ground Percales, with stripes and figures, very full; cape and braid trimmed yoke. Instead of \$1.00, or may be \$1.25, our opening price will be
